## EXPLOSIVE SAFETY STANDARD

---

This instruction establishes procedures for receiving, Safe Haven/Refuge, Hazardous Cargo and Munitions. It applies to all personnel assigned to Munitions Flight (OG/MACW), Base Supply, the Surface Freight Element (LGTT) of the Traffic Management Office and Security Police.

SUMMARY OF CHANGES: Changed publication to the new format. Changed title and publication number. Changed permissible routes of travel for munitions loaded vehicles and procedures for after hours delivery. Included instructions to comply with LAFB OPLAN 125-37; *Resources Protection*, Appendix 10 to Annex C, Appendix 22 to Annex C, and Tab A to Appendix 22 Annex C. Additionally, Tab B to Appendix 22 to Annex C and Tab A to Appendix 23 to Annex C were also used as references.

**1. (DOE) SAFE HAVEN/SAFE HAVEN REFUGE/HAZARDOUS CARGO.**

1.1 **Safe Haven Refuge / Hazardous Cargo:** The primary entry/exit route is the Main Gate Near HWY 90. The vehicle will be held in the main gate parking lot until properly inspected by (LGTT). The **primary** route is south on Liberty Dr to Alabama Ave, East on Alabama Ave, then North on Kansas Ave onto the north perimeter road. Proceed right, on the dirt road, to the inactive runway. Go East, on the inactive runway; to the HOT CARGO PAD holding area. Upon termination of **Safe Haven / Refuge, or Hazardous Cargo Vehicle**, the routing off base will be the reverse of the entry route.

**2. Class A & B Munitions.**

2.1. NORMAL DUTY HOURS: (0700-1600) The **primary** point of entry/exit to Laughlin AFB transporting DOT class A and B munitions is the Main Gate near Hwy 90, where the vehicle will be held in the main gate parking lot until properly inspected. The **primary** route is then south on Liberty Dr to Alabama Ave, East on Alabama Ave then North on Kansas Ave to the perimeter road. Next proceed right, on the dirt road, to the inactive runway. Finally proceed East, on the inactive runway to the HOT CARGO PAD holding area.

2.1.1. For munitions being delivered to Laughlin AFB, the cargo will be held at the Hot Cargo Pad until accepted by the munitions personnel. The route of travel to bldg 950 will be the southern perimeter road.

2.1.2. The **alternate** route for transporting class A and B munitions is the West Gate (for vehicle inspection). Proceed NE on Laughlin Dr to Liberty Dr, SE to Arnold Blvd, NE to Second St, then SE on Second St to Bldg 950 for storage.

2.2. **OTHER HOURS:** During other hours, the normal entry / exit route is the Main Gate Hwy 90, where the vehicle will be held in the main gate parking lot until properly inspected. The **primary** route is then south on Liberty Dr to Alabama Ave, East on Alabama Ave, the North on Kansas Ave, to the perimeter road. Proceed right, on the dirt road, to the inactive runway, then East on the inactive runway, to the Hot Cargo Pad holding area.

2.2.1. For munitions being delivered to Laughlin AFB, the cargo will be held at the Hot Cargo Pad until accepted by the munitions personnel. The route of travel to bldg 950 will then be the southern perimeter road or the "alternate route if necessary."

2.2.2. Upon termination of Safe Haven/Refuge or Suspect Vehicle the routing off base will be reverse of the entry route.

2.2.3. The alternate route for transporting class A and B munitions is the West Gate (for vehicle inspection) NE on Laughlin Dr to Liberty Dr, SE to Arnold Blvd, NE to Second St, then SE on Second St to bldg 950 for storage. If not Laughlin AFB designated munitions, continue on the south perimeter road to the hot cargo pad.

### 3. CLASS "C" MUNITIONS.

3.1. **NORMAL DUTY HOURS** Class C items to be received at Laughlin AFB are to be delivered to the transportation dock, bldg 77 via Liberty Dr for processing and movement to bldg 950 for storage. The primary point of entry is the main gate.

3.2. **OTHER HOURS** When OG/MACW personnel can not be contacted for immediate delivery to bldg 950, contact the LGT "Standby/on call" personnel. Class C items can be delivered to bldg 77 Supply Storage warehouse. It can be held for storage temporarily (not to exceed 24 hours) in the explosives licensee holding area.

### 4. TASKINGS.

4.1. 47 OG/MACW on-call personnel will, when notified by WCP or the Security Police Desk Sergeant, inspect Laughlin destined munitions and in-process cargo.

4.2. 47 LS/LGTTF personnel will, when notified by WCP or the Security Police Desk Sergeant, inspect in-bound munitions vehicles and documentation at the appropriate designated vehicle inspection area.

4.3. 47 SPS/CC will mark the primary and alternate munitions routes on the base map at the Law Enforcement Desk and ensure the routes are current. Provide a suitable scaled base map, with marked munitions routes, to the Security Police patrol escorting munitions vehicles.
